[Webstorm 11.0.1 For Mac](#)

The screenshot displays the IntelliJ IDEA IDE interface. The main editor window shows the source code for a Java class named `LookAndFeelFrame`, which extends `JFrame`. The code includes comments and implements a GUI with a north panel containing a label, a button, and a combobox. The IDE's interface includes a project structure view on the left, a toolbar at the top, and a Mac OS X dock at the bottom.

```
import java.awt.*;

/**
 * Created with IntelliJ IDEA.
 * User: Administrator
 * Date: 1/16/13
 * Time: 9:43 PM
 * To change this template use File | Settings | File Templates.
 */
public class LookAndFeelFrame extends JFrame {

    private UIManager.LookAndFeelInfo[] looks; //look and feels
    private String[] lookNames; //names of look and feels
    private JRadioButton radio; //radio buttons to select look-and-feel
    private ButtonGroup group; //group for radio buttons
    private JButton button; //displays look of button
    private JLabel label; //displays look of label
    private JComboBox comboBox; //displays look of combo box

    //set up GUI
    public LookAndFeelFrame()
    {
        super("Look and Feel Demo");

        //get installed look-and-feel information
        looks = UIManager.getInstalledLookAndFeels();
        lookNames = new String[looks.length];

        //get names of installed look-and-feels
        for (int i = 0; i < looks.length; i++)
            lookNames[i] = looks[i].getName();

        JPanel northPanel = new JPanel(); //create north panel
        northPanel.setLayout(new GridLayout(3, 1, 0, 5));

        label = new JLabel("This is a " + lookNames[0] + " look-and-feel", SwingConstants.CENTER); //create label
        northPanel.add(label); //add label to panel

        button = new JButton("JButton"); //create button
        northPanel.add(button); //add button to panel

        comboBox = new JComboBox(lookNames); //|
    }
}
```
